DIRECTORATE OF ECONOMICS & STATISTICS
RAJASTHAN, JAIPUR.

INTRODUCTION

On 26th January this year the Directorate presented for the first time its Annual Statistical Abstract, 1958, which contained data in respect of the year 1957/1956-57 and to reduce the time-lag, it is quickly being followed by the present issue for the year 1959 which contains data for the year 1958 in respect of calendar statistics and 1957-58 for financial and agricultural statistics. Like the previous issue, the Statistical Abstract of Rajasthan has been planned to fulfil the need of making available comprehensive and detailed information at one place relating to the economic and social life in the State. The pattern followed in presenting the tables is the same as in the previous issue where we have given data for the State as a whole for the preceding 5-6 years and its districtwise breakdowns for the reference period of the Abstract. This year, in order to improve the coverage of topics, in the Abstract we have added 28 more tables. We propose to continue this process in our next issue as well. We are also planning to incorporate in our next issue short notes on the concepts, definitions, coverage, methodology etc. The source of information quoted at the foot of the table indicates either the earlier published source from which the data has been abstracted or the source of supply of information if the data has not been published earlier.

It has been possible to bring out this publication again with the active co-operation of the various Departments of the Government for which we are grateful to everyone of them. We look forward for their continued assistance as well as constructive suggestions from our readers to make the publication more useful.
